## Summary

I find AI genuinely exciting – not just as a subject but as a creative tool. My projects span healthcare AI, fintech, and GenAI, and each one started with a ‘what if’ moment. Final-year CSE (AI/ML) student at Bennett University, always learning, always building.

## Education

### Bennett University

B.Tech – Computer Science & Engineering, Specialization: AI/ML | CGPA: 8.4

### Convent of Jesus and Mary

Senior Secondary (Class XII)

Greater Noida, India

Aug 2023 – May 2027

Shimla, India

Passed 2023

## Technical Skills

**GenAI & LLMs:** RAG Pipelines, Prompt Engineering, Fine-Tuning, GANs, Transformers, Diffusion Models

**ML & AI:** Machine Learning, NLP, Sentiment Analysis, XAI (SHAP), Genetic Algorithms, Fuzzy Logic, Recommender Systems

**Dev & Tools:** Python, Django, HTML, CSS, JavaScript, Git, Jira, Botpress

**Data:** Data Visualization, SQL, TF-IDF, Cosine Similarity, scikit-learn, NumPy, Probability & Statistics

## Projects

### Arthav – AI-Powered Financial Advisor | XAI, SHAP, TF-IDF, Groq LLM, Django

- Designed a personalized investment advisor with a full ML pipeline including language detection, TF-IDF intent classification, risk scoring, and explainability using SHAP-based reasoning.
- Integrated Groq’s Llama 3 LLM for financial responses supporting Hinglish and English inputs; includes fund recommendations and risk warnings.

### Niramay – AI Ayurvedic Health Platform | Genetic Algorithm, Fuzzy Logic, Django, Python

- Built a Genetic Algorithm engine with tournament selection, crossover, and mutation operators to evolve and rank Ayurvedic remedy combinations across 50 generations.
- Applied Fuzzy Logic for severity-based dosage recommendations (mild, moderate, severe) across 3 custom domain-specific datasets covering remedies, recipes, and medicinal plants.

### Prompt Optimizer – AI Prompt Engineering Tool | Prompt Engineering, Django, OpenAI API

- Developed a web app that converts vague user queries into structured, role-based optimized prompts with category classification, improvement suggestions, and explanation output.
- Implemented dual-mode pipeline with OpenAI GPT integration and intelligent rule-based fallback; maintains full prompt history via Django ORM.

### Movie Recommender System | Machine Learning, Cosine Similarity, Python

- Built a content-based recommender using cosine similarity on the IMDB dataset; suggests films based on genre and feature similarity with an interactive user interface.

## Certifications

Generative AI for Everyone – DeepLearning.AI

NLP: Fine-Tune & Preprocess Text – Coursera

GenAI Language Modeling with Transformers – IBM

Introduction & Advanced Neural Networks – Johns Hopkins

Practical Methodology & Ethics in AI – Johns Hopkins

Generative AI: Prompt Engineering Basics – IBM

Build RAG Applications: Get Started – IBM

Build Basic & Better GANs – DeepLearning.AI

Machine Learning – Stanford (Coursera)

Generative AI – Google Cloud

## Achievements & Interests

- Bollywood Film Credit** – acted in ‘Sanam Re’ (T-Series) and earned first professional paycheck in performing arts
- Most Promising Speaker** – recognized at Interschool Debate Competition for public speaking and leadership
- House Captain** – led school teams in events and organized cultural programs
- Interests:** Swimming, Cycling, Photography, Cooking, Dancing, Singing
